

Freshwater Cooling Kits

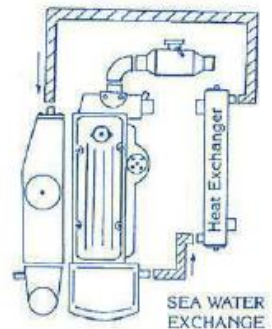

for 153-181 CID. Mercruiser & OMC 4 Cylinder Boat Engines

Extend the life of your engine and protect it from corrosion with this **EASY TO INSTALL**, quality built, heat exchanger.

1. Get better fuel efficiency through higher engine operating temperatures
2. Allows use of hot water cabin heater in cooler climates
3. Winter draining of engine block is unnecessary
4. Dual zinc anodes prevent electrolysis
5. Kit includes detailed installation instructions
6. Rust inhibitor antifreeze protection
7. Workmanship and materials fully guaranteed

Modern manufacturing techniques have evolved into a less expensive automation process. These savings are passed on to you. This is a complete kit, there is nothing extra to buy.
